## EDUCATION

### Vellore Institute of Technology

Master of Computer Applications (CGPA: 7.53)

Vellore, Tamil Nadu

Aug 2024 – Jul 2026

## EXPERIENCE

### TeamLease Services

Software Development Engineer

Bengaluru, India

Jan 2024 – Jun 2024

- Engineered an **event driven user onboarding architecture** using **REST based Webhooks**, drastically reducing data synchronization latency from 4 hours to **near real time**.
- Architected a custom **OQL (Object Query Language)** reporting engine to process and aggregate **energy consumption datasets** (10,000+ records), optimizing query performance for high volume data retrieval.
- Developed production ready microflows for the Siemens Sifinity Fleet platform by processing and integrating incoming telemetry data, implementing complex **domain models** and **core business logic**.

### Adept Chips Services

Software Engineer

Bengaluru, India

Jun 2022 – Dec 2023

- Developed a cross platform EV commissioning suite for **iOS, Android and Desktop** using **Ionic Angular** and **Electron**, driven by a unified **Node.js** backend to ensure cross device feature parity.
- Led the complex migration of the VersiCharge Configurator from **Angular 9 to Angular 14**, resolving critical **OSS security vulnerabilities** and spearheading a comprehensive UI revamp.
- Engineered a voice controlled IoT commissioning **Proof of Concept (POC)** using the **Alexa Skills Kit**, demonstrating hands free hardware configuration to business stakeholders.
- Resolved critical **FCM token synchronization** failures for the China region and executed European cellular compliance updates, ensuring stable and standards compliant international releases before project handover.

## PROJECTS

**MIRROR** | *Spring Boot, Ionic Angular, PostgreSQL (pgVector), Gemini & Groq*

Mar 2026 – Jul 2026

- Engineered an AI driven, cross platform journaling app** (Web & Android) utilizing **Ionic Angular**, **NgRx** and **Capacitor**.
- Architected a resilient Microservices backend** using Spring Boot, integrating **Redis** for caching and rate limiting, **Resilience4j** for circuit breaking and **Zipkin** for distributed tracing.
- Implemented a Retrieval Augmented Generation (RAG) pipeline** using **Gemini** and **Groq APIs** to enable intelligent, contextual memory recall and conversational interactions.
- Designed a serverless vector database layer** using **Neon (PostgreSQL)** and **pgVector** for high dimensional embedding storage, powering semantic search and emotional pattern recognition.
- Established a fully automated CI/CD pipeline** via GitHub Actions, orchestrating seamless deployments of the frontend to **Vercel** and the distributed backend to **Microsoft Azure**.

**Semester 3 Study Guide** | *Google Sites, Google Analytics*

Jan 2026 – Jul 2026

- Launched an academic resource platform** designed to assist MCA students with targeted Semester 3 exam preparation.
- Scaled the platform to 75+ active users** globally across India and the US, integrating **Google Analytics** to continuously monitor live user traffic.

## TECHNICAL SKILLS

|                      |                                                                             |
|----------------------|-----------------------------------------------------------------------------|
| Languages            | : Java, TypeScript, JavaScript, SQL (PostgreSQL), OQL                       |
| Frameworks & Libs    | : Spring Boot, Angular, Ionic, NgRx, Capacitor, Node.js, Electron           |
| Architecture & Cloud | : Microservices, REST APIs, Webhooks, CI/CD, RabbitMQ, Redis, Azure, Vercel |
| AI & Database        | : RAG Architecture, pgVector, Gemini API, Groq API, Neon                    |
| Developer Tools      | : Git, GitHub Actions, Postman, IntelliJ, VS Code                           |
