

SUMMARY

Software Engineer with 2+ years of experience delivering full-stack applications across web, mobile, and desktop. Experienced in Agile environments, collaborating closely with cross-functional teams to build reliable backend services, automate workflows, and ship cross-platform products.

EXPERIENCE

TeamLease Services	Bengaluru, Karnataka
<i>Software Development Engineer</i>	<i>Jan 2024 – Jun 2024</i>
- Developed and deployed secure REST APIs in an Agile sprint environment, enforcing input validation and data sanitization. - Integrated Webhooks for automated user onboarding, cutting data synchronization latency from 4 hours to real-time. - Automated monthly reporting workflows by developing optimized OQL queries, eliminating manual data extraction tasks. - Implemented backend business logic in Java to parse, validate, and process high-volume application data.	
Adept Chips Services	Bengaluru, Karnataka
<i>Software Engineer</i>	<i>Jun 2022 – Dec 2023</i>
- Developed cross-platform applications across iOS, Android, and Desktop from a single codebase using Ionic Angular, Electron, and Node.js. - Migrated frontend codebase from Angular 9 to Angular 14, resolving dependency vulnerabilities and modernizing legacy components. - Streamlined device onboarding workflows, reducing EV charger setup time by up to 75% (from 6 minutes down to 1–3 minutes). - Built a voice-controlled IoT prototype utilizing Alexa Skills Kit and RESTful APIs for hands-free EV charger configuration. - Investigated and resolved production defects, actively participating in code reviews and adhering to secure development guidelines.	

PROJECTS

Mirror <i>Spring Boot, Ionic Angular, PostgreSQL (pgVector), Gemini & Groq</i>	<i>Mar 2026 – Jul 2026</i>
- Built a cross-platform AI journaling application (Web & Android) using Ionic Angular with responsive UI components. - Developed backend microservices using Java 17 and Spring Boot, integrating RabbitMQ for messaging and Redis for session caching. - Implemented Retrieval-Augmented Generation (RAG) using pgVector, Gemini, and Groq APIs to enable context-aware semantic search. - Configured CI/CD pipelines using GitHub Actions for automated testing and deployment to Vercel and Azure.	
Semester 3 Study Guide <i>Google Sites, Google Analytics</i>	<i>Jan 2026 – Jul 2026</i>
- Built an academic resource platform to centralize curriculum materials and exam preparation for MCA students. - Grew the platform to 75+ active users, integrating Google Analytics to monitor user traffic and engagement patterns.	

EDUCATION

Vellore Institute of Technology	Vellore, Tamil Nadu
Master of Computer Applications CGPA: 8.1/10	<i>Aug 2024 – Jul 2026</i>

TECHNICAL SKILLS

Languages	: Java 17, TypeScript, JavaScript, SQL
Frameworks & Libraries	: Spring Boot, Angular, Ionic, NgRx, Capacitor, Node.js, Electron
Architecture & Cloud	: Microservices, REST APIs, Webhooks, CI/CD, RabbitMQ, Redis, Azure, Vercel
AI & Databases	: RAG Architecture, pgVector, Gemini API, Groq API, Neon, PostgreSQL
Developer Tools	: Git, GitHub Actions, Postman, IntelliJ, VS Code, GitHub Copilot
