

SUMMARY

Software Engineer with 2+ years of experience building frontend, backend, and database solutions for web, mobile, and desktop applications. Skilled in Java, Node, Mendix, Angular, SQL, and cloud tools, working closely with teams in fast-paced Agile environments.

TECHNICAL SKILLS

- Programming Languages : Java 17, TypeScript, JavaScript, SQL
- Backend & APIs : Spring Boot, Mendix Low-Code, REST APIs, Microservices, Node
- Frontend Frameworks : Angular, Ionic Angular, Electron, Responsive UI
- Cloud, DevOps & DB : PostgreSQL, Redis, RabbitMQ, Azure, Git, GitHub Actions
- Engineering Practices : Agile / Scrum, Code Reviews, Bug Fixing, AI Integration

EXPERIENCE

- TeamLease Services (Client: Siemens)

Bengaluru, Karnataka

Software Development Engineer

Jan 2024 – Jun 2024

 - Developed enterprise applications on the Mendix low-code platform, building modules and automated workflows in Agile sprints.
 - Integrated Webhooks for automated user onboarding, cutting data sync time from 4 hours down to real-time.
 - Wrote and optimized OQL queries to automate monthly report generation and remove manual data tasks.
 - Used Java actions to write custom backend business logic, validate inputs, and process application data smoothly.
- Adept Chips Services (Client: Siemens)

Bengaluru, Karnataka

Software Engineer

Jun 2022 – Dec 2023

 - Built cross-platform web and desktop applications using Angular, Ionic Angular, Electron, and Node.
 - Upgraded the frontend code from Angular 9 to Angular 14 to fix security vulnerabilities and update old components.
 - Improved device setup steps, making EV charger configuration 75% faster (dropping time from 6 minutes to 1–3 minutes).
 - Fixed software bugs, checked code quality, and worked with testing teams to ship stable updates.

PROJECTS

- Mirror | Spring Boot, Ionic Angular, PostgreSQL (pgVector), Gemini & Groq

Mar 2026 – Jul 2026

 - Built a cross-platform AI journaling app for the web and Android with a clean, responsive user interface.
 - Created backend microservices using Java 17 and Spring Boot, using RabbitMQ for messaging and Redis for caching.
 - Added smart search features using PostgreSQL with pgVector, connected with Gemini and Groq AI tools.
 - Set up automated testing and deployment pipelines using GitHub Actions for Azure and Vercel.
- Semester 3 Study Guide | Google Sites, Google Analytics

Jan 2026 – Jul 2026

 - Created an online study platform to organize learning materials and exam notes for students.
 - Grew the site to 75+ active users and used Google Analytics to track visitor traffic and popular pages.

EDUCATION

- Vellore Institute of Technology

Master of Computer Applications | CGPA: 8.1/10
- Vellore, Tamil Nadu

Aug 2024 – Jul 2026
